

Reflection

Teacher: Mr Mohammed Tashmeer	Date: 26 May, 2015	Time: 11.40 am - 12
Class: 13LS4	Period: 4	Room: Learning Centre

The lesson was on identifying Topic Sentences and developing a better understanding of the text. The objective of the lesson was to broaden student's knowledge about identifying Topic Sentence.

I did find out about the student's prior knowledge which helped me to set up a relevant task. The activity was related to a reading that the student had to do which would be followed up with questions.

The activity also involved highlighting important vocabulary. I wrote the important vocabs and discussed that while reading the text. I tried to involve the student in the discussion by checking on her prior knowledge about food chain.

It has to be a more student centred as I could have asked the student to map the important ideas. Secondly, as suggested I could have asked the student to highlight the important ideas.

I can improve on the strategies for a similar activity as I can focus on involving the student. I will get a copies of the article so that student can highlight the important ideas. It can be intensive exercise, therefore, emphasis needs to be placed on breaking the passage into small paragraphs so the student can pick on important ideas.

The feedback provided has been helpful, as it provided me a better understanding of working one-on-one and in groups. Follow up activity were a set of questions that were related to the article.
